Page 11, line 1 change "--GARMRMT" to --GARMENT--

### **Amendment B**

#### **Claims:**

p.10, cancel the claim of record and substitute the following new claims:

1. A breast supporting garment including a torso portion, a breast supporting front portion and a back portion:

    said garment comprising elastic fabric and having areas of non-slipping material on a surface of said fabric; said areas being of sufficient size and location to counter the tendency of said garment to

slide out of place on the wearer's body;

- (a) said areas of non-slipping material comprising silicone, latex rubber or soft plastic material, or a mixture thereof ;
- (b) said areas of non-slipping material having a thickness in the range of greater than .5 mm to 2 mm;
- (c) said areas of non-slipping material being permanently affixed to said garment;
- (d) said garment being of construction including elastic materials so as to be under sufficient tension on the said wearer's body to maintain contact between said areas of non-slipping material with said wearer's skin;
- (e) said areas of non-slipping material being on an inner surface of said garment and being the surface of said garment in contact with said wearer's skin;
- (f) said areas of non-slipping material being located on said garment inner surface in at least any one of the following garment locations or any combination thereof including on straps, cup areas or the torso encircling portion.

2. A breast supporting garment including a torso portion, a breast supporting front portion and a back portion:

    said garment comprising elastic fabric and having areas of non-slipping material on a surface of said fabric; said areas being of sufficient size and location to counter the tendency of said garment to
